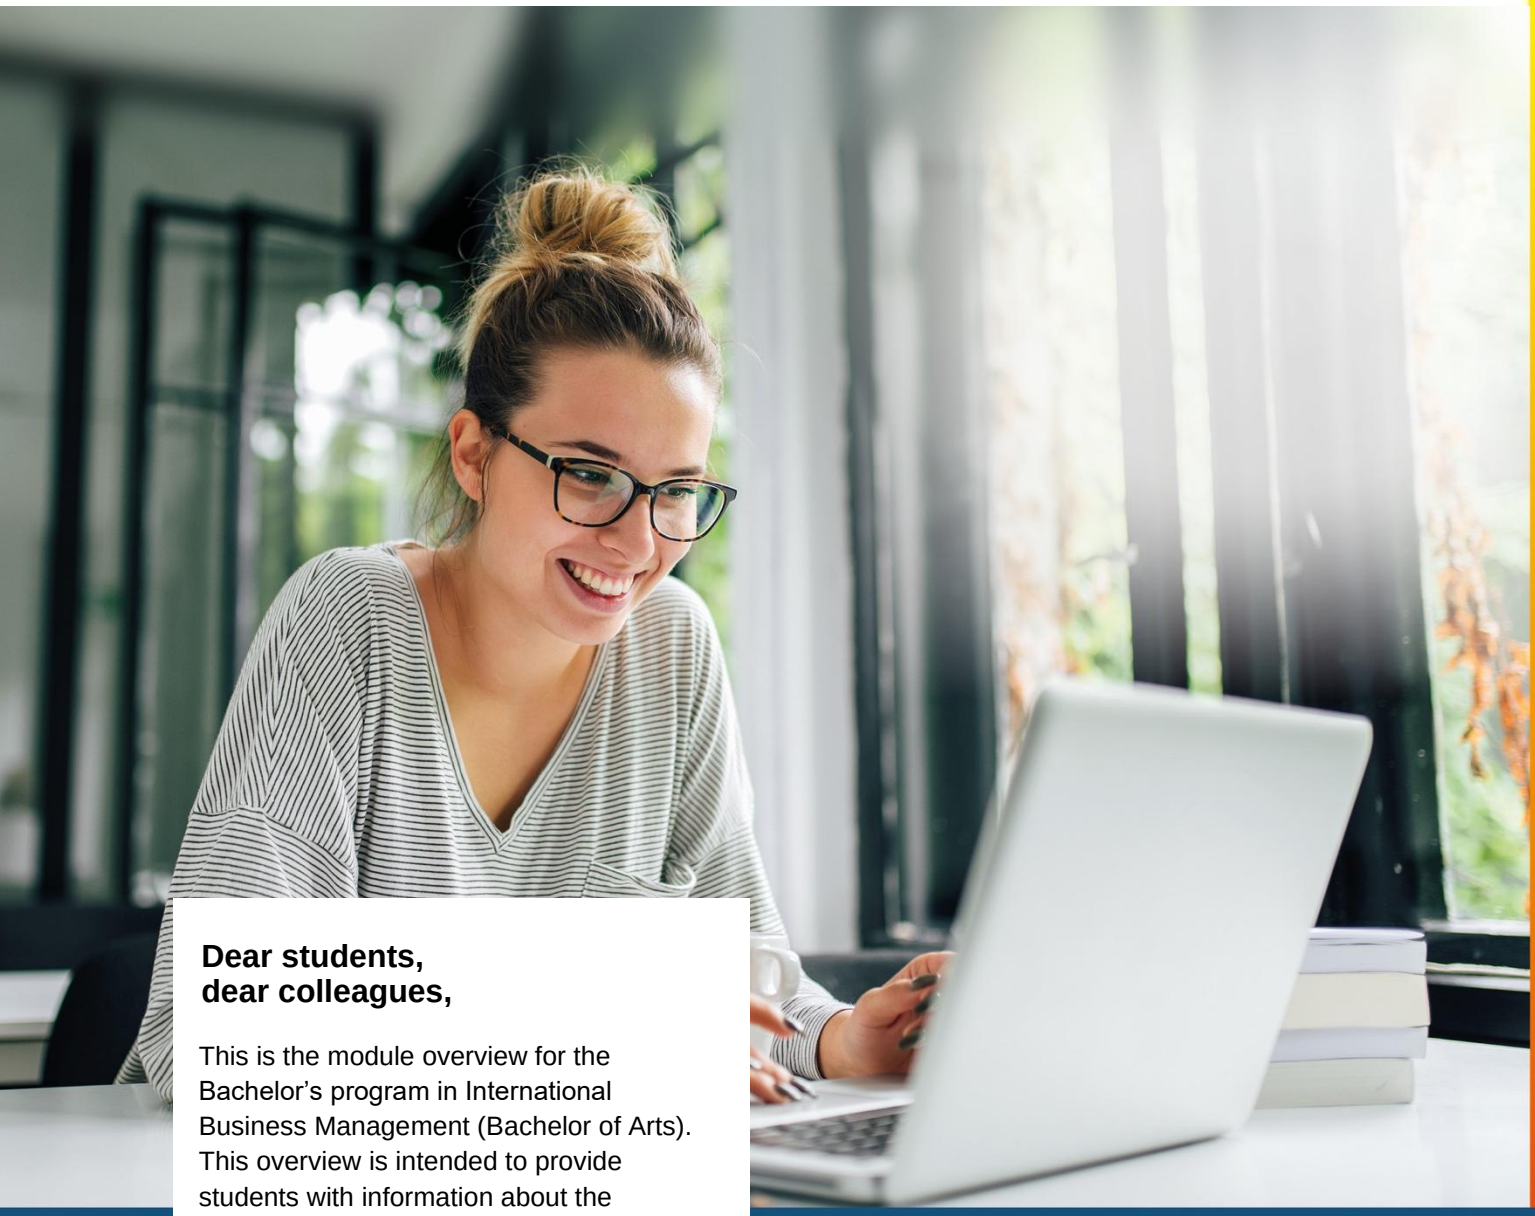
International Business Management

Bachelor of Arts

Academic Year 2025

www.fhdw.de



Dear students,
dear colleagues,

This is the module overview for the Bachelor's program in International Business Management (Bachelor of Arts). This overview is intended to provide students with information about the program's content.
In addition, it should also be used by lecturers for cross-module coordination.

Prof. Dr. ANGELIKA RÖCHTER
Dean Business Administration

Colloquium *89*

Exam performance

Appendix 1 includes the following legend which explains the type and extent of the exam performance in more detail:

EXAM	PERFORMANCE
E	The examination is in written form; in this case the number gives the length of the exam in minutes.
EP	The examination is **either** a presentation **or** a written exam; in the case of a written exam, the number gives the length of the exam in minutes.
EPR	The examination is **either** a written exam **or** a presentation **or** a research paper; in the case of a written exam, the number gives the length of the exam in minutes.
ER	The examination is **either** a research paper **or** a written exam; in the case of a written exam, the number gives the length of the exam in minutes.
O	The examination consists solely of an oral exam.
P	The examination consists of a presentation in connection with a short paper.
OP	The examination is **either** an oral exam **or** a presentation.
PR	The examination is **either** a presentation **or** a research paper.
R	The examination consists solely of a research paper.

If there are two forms of exams given, the highlighted form of exam is the preferred one, the second form of exam is the alternative.

(*) For students with no knowledge of German, "German as a foreign language" is compulsory. For the others, Chinese, Spanish and French are available for advanced learners.
(**) The student chooses one of the electives. The electives are offered if the minimum number of participants is reached.

SEMESTER 1

Introduction to Business

Basic Information

Abbreviation	BAIBU
Person in Charge of Module	Prof. Dr. Gerhard Peters
Language	English
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Weighting	5/150
Exam	E90

Keywords

- Economic Systems
- Business Ethics
- Corporate Social Responsibility
- Business Ownership
- Organizational Structure
- Management and Leadership
- Financial Management

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the primary functions of a business and how business is influenced by different components of the economic environment.
- recognize the relevance of ethical standards and a company's social responsibility to various stakeholders and to society as a whole.
- know different forms of business ownership and are able to approach their advantages and disadvantages.
- analyse traditional and contemporary forms of organizational structures and understand the importance of the informal organization.
- understand the basic role of management and the primary functions of managers in organizing activities.
- have a basic understanding of financial institutions and different aspects of financial management.

Teaching and Learning Methods

Lecture, Self-study, Exercises, Case Studies, Literature studies, Group Work, Presentations

Content

Understanding Economic Systems and Business
- The Nature of Business
- Business Evironment
- Basic Economic Concepts
- Competing in a Free Market

Ethical Decisions and Corporate Social Responsibility
- Understanding Business Ethics
- Managing a Socially Responsible Business
- Responsibility to Stakeholders

Forms of Business Ownership
- Going it alone: Sole Proprietarship
- Partnerships
- Corporations
- Specialized Forms of Business Organization
- Mergers and Acquisitions

Designing Organizational Structures
- Traditional Forms of Organizational Structure
- Authority and Centralization
- Contemporary Structures and Trends
- The Informal Organization

Management and Leadership
- The Role of Management
- Planning, Organizing, and Controlling
- Leading, Guiding, and Motivating Others
- Managerial Roles and Skills
- Trends in Management and Leadership

Understanding Money, Financial Institutions, and Financial Management
- Financial Institutions and International Banking
- Role of Finance and Financial Manager
- Short-term and Long-term Financing
- Security Markets

Basic Readings

GITMAN, L.G., McDaniel, C., Shah, A.: *Introduction to Business*. 12th Media Services, 2018.
NEEDLE, D., BURNS, J.: *Business in Context: An Introduction to Business and its Environment*. 7e, Cengage Learning EMEA, 2019.

Further Readings

NECK, H.M., NECK, C.P., MURRAY, E.L.: *Introduction to Business*. 7e, Cengage Learning EMEA, 2023.
FLYNN, P.: *Introduction to Business. A Primer on Basic Business Operations*. Business Expert Press, 2019.

Business Mathematics

Basic Information

Abbreviation	BABM
Person in Charge of Module	Prof. Dr. Katrin Witting
Language	English
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annuall
Exam	E90

Keywords

- Set theoretical foundations
- Propositional logic
- Equations and Inequations
- Financial mathematics
- Differential calculus
- Economic functions
- Linear algebra
- Integral calculus

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module students, are able to

- have a solid knowledge in the areas of naive set theory, propositional logic, financial mathematics, differential calculus of one or several variables, linear algebra, and integral calculus.
- identify the logical structure of complex propositions, mathematical or otherwise, and understand the respective proof-theoretical implications.
- solve linear, quadratic, or higher-degree equations.
- model and solve problems of financial mathematics, using methods of interest and compound interest calculation, discounting, annuity calculation and investment appraisal.
- apply methods of differential calculus, linear algebra, and integral calculus, respectively, to economic problems and functions, thereby deriving solutions as well as making business decisions.

Teaching and Learning Methods

Classical lecture with integrated exercises and examples. Selected calculation examples in Excel, e.g. for problems in financial mathematics. Extensive use of exercises, both, in class and at home. Simultaneous study of textbooks.

Content

Foundations
- Propositional logic
- Sets, relations, functions
- Sequences, series, limits
- Linear, quadratic, and higher-order equations
- Inequations

Financial mathematics
- Depreciation
- Simple and compound interest calculation
- Discounting
- Annuities
- Investment appraisal methods

Differential calculus for functions of one variable
- Foundations of differential calculus
- Rules of differentiation
- Application to economic functions
- Elasticity of economic functions

Linear algebra
- Vectors and matrices
- Linear equation systems

Differential calculus for functions of several variables
- Functions of several variables
- Partial differentiation
- Extreme values and economic functions

Integral calculus
- Foundations of integral calculus
- Integration by parts and substitution
- Application in economics
- Interpolation and numerical integration

Basic Readings

BRONSON, G., BRONSON, R., KIEFF, M.: *Mathematics for Business*. 7e, Mercury Learning and Information, 2021 (Print and eBook).
WERNER, F., SOTSKOY, Y. N.: *Mathematics of Economics and Business*. Routledge, 2006 (Print and eBook).
BROWN, R., ZIMA, P.: *Schaum's Outline of Mathematics of Finance*. 2e, McGraw Hill, 2011.

Further Readings

JAQUES, I.: *Mathematics for Economics and Business*. 10e, Pearson, 2023.

Business English

Basic Information

Abbreviation	BABEN
Person in Charge of Module	Karin Carroll-Scott
Language	English
ECTS Points	5
Contact hours	80
Self-study hours	45
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Company Organisation
- Marketing
- Sales & Distribution
- Business Correspondence
- Recruitment

Admission Requirements for the Module

- Level B2 CEFR (Common European Framework of Reference for Languages)

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- develop communicative competence in English that encompasses both receptive (listening and reading) and productive (speaking and writing) skills on level CEFR B2.2)
- know the terminology and grammar, as well as the fluency, which will enable them to deal with advanced business topics in both written and spoken form.
- to interact with international business partners on an advanced level.

Teaching and Learning Methods

Modern foreign language teaching methods are employed. The focus is on functional instrumentalization of the language using interactive processes. Receptive and productive competencies are trained using role plays, partner and group work, exercises, case studies, audio and video sequences, and internet research.

Content

Forms of Company Organisation I
- Basic Vocabulary
- Small Businesses
- Limited‘ versus ‚Unlimited‘
- Case Studies

Forms of Company Organisation II
- Internal Company Structures / Organigrams
- Company Profiles
- Case Studies

Products and Production
- Basic Vocabulary
- Describing Products
- Production Processes

Marketing
- Basic Vocabulary
- Markets
- Marketing Mix
- Case Studies

Sales & Distribution Networks
- General Aspects
- Networks
- Sales Figures: Interpretation of Tables, Graphs, Diagrams
- Applied Exercises

Business Correspondence
- Enquiries
- Offers
- Orders Order Confirmation
- Complaints
- Terms of Delivery
- Terms of Payment

Recruitment
- Personnel Department
- Applications
- Interviews
- Leadership Styles
- Payment Systems
- Labour Relationships

Basic Readings

EILERTSON, C., Hogan, M.: *Basis for Business B2 - Kursbuch mit PagePlayer-App inkl. Audios und Videos,* Cornelsen Verlag, 2019.
Hart, C.: *Career Express - Business English B2 - 2nd Edition - Kursbuch mit PagePlayer-App inkl. Audios.* Cornelsen Verlag. 2019.

Further Readings

Murphy, R.: *English Grammar in Use*, Cambridge 2020.
Turner, C.: *International Business,* Routledge 2024.

Academic Research

Basic Information

Abbreviation	BAAR
Person in Charge of Module	Prof. Dr. Gerhard Peters
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	R

Keywords

- Academic research
- Research methodology
- Research design
- Research process
- Information literacy

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- have a good understanding of the basics of academic research, theory construction and research methodology.
- evaluate competing theories and assess their usability.
- select appropriate scientific methods for their own research.
- have competencies in scientifically sound and stringent argumentation.
- design and conduct scientific work during their study program (internship and bachelor thesis).
- know the scientific standards of different specialist areas and are competent to apply this knowledge to reflect and shape their own professional acting.
- have a high level of information literacy.
- understand the different types of scientific literature and sources. And use them for their own research activities.
- present complex scientific content and results in a professional manner.

Teaching and Learning Methods

Lecture with integrated exercises, group discussions and group work, homework, case studies, supervised practical exercises

Content

Research and Science

- Quality criteria of scientific work
- Scientific argumentation and theory
- Deductive and inductive theory
- Epistemological considerations
- Research strategy: quantitative and qualitative
- Research designs
- Ethics in academic research

Academic research as research project

- Formulating the research problem and research questions
- Planing and preparing the research
- Data gathering
- Analyzing results
- Academic writing
- Structure of thesis
- Formal requirements for thesis
- Content of thesis
- Presenting and defending the thesis

Literature review and management

- Academic information sources and tools
- Reviewing the existing literature
- Referencing and reference management
- Citing and avoiding plagiarism
- Ethical use of generative AI

Basic Readings

Intercultural Communication & Presentation Skills

Basic Information

Abbreviation	BAICPS
Person in Charge of Module	Prof. Dr. Angelika Roechter
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	P

Keywords

- Culture
- Cross-Cultural Research
- Culture and Communication
- Presentation Training

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- have a thorough understanding of culture and its influence on human thinking and behaviour - especially in the field of international business communication.
- recognize their own cultural imprint, which enables them to reflect on their own and others' behaviour in an intercultural setting
- have a profound knowledge of differences between country cultures and understand how those differences influence peoples' verbal and non-verbal communication.
- can - based on this knowledge - appropriately interpret the behaviour of international business partners, reduce misunderstandings and adapt their own behaviour in order to achieve business goals.
- have significantly improved their competence to communicate and interact in an intercultural environment.
- are able to present different topics to intercultural audience in business settings.

Teaching and Learning Methods

Lecture, Self-study, Exercises, Case Studies, Literature studies, Group Work, Presentations.

Content

Culture
- What is Culture?
- Determinants and Characteristics of Culture
- Culture and Identity
- Perception, Categorization, and Stereotyping

Cross-Cultural Research
- Overview
- Hofstede's Cultural Dimensions
- Trompenaars and Hampden-Turner
- The GLOBE Study

Culture and Communication
- Model of Intercultural Communication
- Verbal and Para-verbal Communication
- Non-verbal Communication

Presentation Skills
- Presentation Structure and Organization
- Delivery Techniques
- Practical Presentation Training

KNAFLIC, C.N.: *Storytelling With You: Plan, Create and Deliver a Stellar Presentation*, Wiley 2022.

Foreign Language I - Deutsch als Fremdsprache I (Level CEFR A1)

Basic Information

Abbreviation	BADFS1
Person in Charge of Module	Karin Carroll-Scott
Language	German
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Grammar
- Everyday life
- German culture

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- develop communicative competence in German that encompass both receptive (listening and reading) and productive (speaking and writing) skills on level CEFR A1
- understand German ways of thinking and behaving, explained from the perspective of German culture and its historical and ideological background.
- read very simple texts.
- understand very simple dialogues
- ask and answer very simple questions.
- write very short notes

Teaching and Learning Methods

Interactive teaching methods are employed. The focus is on functional instrumentalization of the language. Receptive and productive competencies are trained using role plays, partner and group work, exercises, case studies, audio and video sequences, and internet research.

Content

Introductions
- The alphabet
- Numbers
- Introducing oneself and others
- Countries and languages

Everyday life
- Dining at a restaurant
- Cycle of the day
- In the Office
- At the university
- Problems at work
- At the computer
- Making an appointment
- Living environment
- Living in the city
- Furnishing a flat
- Free time
- Special events
- Birthdays
- Parties

Grammar
- Verbs
- Adjectives
- Adverbs
- Nouns
- Present tense
- Word order
- Negations
- Questions
- Personal pronouns
- Prepositions of place

Basic Readings

BUSCHA, A. ET AL.: *Begegnungen Deutsch als Fremdsprache A1+: Integriertes Kurs- und Arbeitsbuch.* Schubert Leiptuig, 2021.
COGGLE, P.: *Willkommen! 1. German Beginners Course*. 3e. Teach Yourself, 2018.

Further Readings

DK: German English Illustrated Dictionary. DK, 2023.

Foreign Language I – Chinese I (CEFR Level A1)

Basic Information

Abbreviation	BACH1
Person in Charge of Module	Karin Carroll-Scott
Language	Chinese
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Basic Grammar
- Everyday life
- Chinese Culture

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competence Goals of the Module:

Upon successful completion of this module, students are able to

- develop comprehensive communicative competence in Chinese, encompassing both receptive and productive language skills (CEFR A1).
- understand Chinese ways of thinking and behavior, explained from the perspective of Chinese culture, including its historical and ideological background.
- understand familiar words and very simple sentences that relate to themselves or their immediate environment.
- ask and answer very simple questions.
- write very short notes and messages.

Teaching and Learning Methods

Receptive and productive skills are taught using task- and action-oriented texts, textbooks, simple authentic materials, and audiovisual aids. Active participation by students in exercises, partner work, role-plays, and discussions are required.

Content

Topics - Everyday life (I)

- Introduction to the language and culture
- Greetings
- Introducing yourself and others
- About the family
- Asking questions
- Saying thank you
- learning numbers
- Making small talk

Grammar (I)

- Word order in Chinese sentences
- Sentences with adjectives
- Personal pronouns
- Interrogative pronouns, forming questions
- Sentences with verbal predicates
- Phonetics
- Initial and final sounds
- Pronunciation rules
- Chinese history and culture

Basic Readings

PANG, ZHAOXIA & HERD, RUTH: Complete Mandarin Chinese. Beginner to Intermediate Course. Teach Yourself, 2021.

Further Readings

LING, LING: Chinese Conversations for Beginners. Chinese Short Stories. Lingling Mandarin, 2024.
DK: Mandarin Chinese English. Bilingual Visual Dictionary. DK, 2024.

RUDOLPH, HILDEGARD: Spanisch. Die neue Power-Grammatik, Hueber: Mannheim, 2021.

Foreign Language I – French Advanced (CEFR Level B2.1.)

Basic Information

Abbreviation	BAFR1
Person in Charge of Module	Karin Carroll-Scott
Language	French
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- The French working world
- Job applications
- Dealing with customers and visitors
- French history and culture
- Grammar

Admission Requirements for the Module

- Level B1 (CEFR) (Common European Framework of Reference for Languages)

Recommendation for the Module

- None

Qualifications and competency goals of the module:

Upon successful completion of this module, students are able to

- develop communicative competence in French that encompass both receptive (listening and reading) and productive (speaking and writing) skills on level CEFR B2.1.
- understand complex economic topics presented in the form of lectures and discussions.
- read longer economic texts at an intermediate level and understand their content.
- express themselves fluently in the target language. They can present and defend their views on various economic topics.
- handle business correspondence and write coherent texts on various economic topics.

Teaching and Learning Methods

Based on modern foreign language teaching methods. The focus is on the functional and instrumental aspects of language in interactive situations. Receptive and productive skills are taught through role-playing, partner

and group work, exercises, case studies, audio and video sequences, and Internet research.

Content

The French working world

- Introduction to the terminology related to this topic
- The working population
- Different occupational categories
- New forms of work (teleworking, flexible working hours, temporary work)
- The employment relationship (employment contract, CDD, CDI, minimum wage/termination)
- Unemployment
- Social achievements

Job applications

- Job advertisements
- Resume
- Application documents
- Job interview

Dealing with customers and visitors

- Welcoming customers and visitors
- Company tours
- Expressing opinions, meetings

French history and culture

Grammar

- Conjugating the past participle with ‘avoir’ in the passé composé
- The passé composé of pronominal verbs
- Comparison of ‘imparfait’ and ‘passé composé’
- The unreal conditional clause with “si”
- Indirect style
- Conditional I and II: formation, irregular verbs
- and possible uses

Basic Readings

SEMESTER 2

Global Business Environment

Basic Information

Abbreviation	BAGBE
Person in Charge of Module	Prof. Dr. Angelika Roechter
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	E**P**90

Keywords

- Globalization
- Global Institutions
- International Trade
- Trade Theories
- Foreign Direct Investment
- Trade Agreements
- Regional Integration
- PESTLE-Analysis

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Intercultural Communication

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the international business context in theory and practice.
- explain the current globalization status and trends.
- reflect the dynamics of the global business context on the basis of relevant theories.
- analyse the role of important multinational institutions and the interrelation of economic and political agendas.
- be familiar with economic integration approaches and can evaluate concrete regional integration with a special emphasis on the European Union.
- interpret the significance of country-specific differences for international business activities.
- draw conclusions from all the above and identify opportunities and challenges for multinational enterprises.

Teaching and Learning Methods

Lecture, Self-study, Exercises, Case Studies, Literature studies, Group Work, Presentations

Content

Globalization
- Fundamentals of Globalization
- The World Economic Geography
- Global Institutions
- Impact of Globalization

International Trade and Foreign Direct Investment
- Basic Definitions and Current Trends
- International Trade Theories
- Political Economy of International Trade
- Foreign Direct Investment

Regional Economic Integration
- Introduction
- Europe (EU)
- North America (USMCA / NAFTA)
- Central- and South America (MERCOSUR et al.)
- Asia (ASEAN et al.)
- Africa

National Differences
- Introduction: PESTLE-Analysis
- Political Environment
- Economic Environment
- Legal Environment
- Other Environmental Factors

Basic Readings

HILL, C. W.L.: *International Business – Competing in the Global Marketplace*. 14e (Global Edition), McGraw-Hill, 2022.
DANIELS, J., RADEBAUGH, L., SULLIVAN, D.: *International Business. Environments & Operations*. 17e (Global Edition), Pearson Education, 2021.

Further Readings

BARTLETT, C. / BEAMISH, P.: *Transnational Management*. 8e (International Edition), Cambridge University Press, 2018.
COLLINSON, S., NARULA, R., RUGMAN, A.M.: *International Business*. 8e, Pearson, 2020.

Business Statistics

Basic Information

Abbreviation	BABSTA
Person in Charge of Module	Prof. Dr. Yvonne Gorniak
Language	English
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Descriptive statistics
- Observation variables
- Data collection, preparation, and sample selection
- Distributions and distribution parameters
- Correlation and linear regression
- Time series analysis
- Permutations, combinations, and variations
- Probability theory
- Random variables

Admission Requirements for the Module

- None

Recommendation for the Module

- Business Mathematics

Qualification and Competency Goals

Upon successful completion of this module students, are able

- professionally collect, prepare and present statistical material.
- Recognise the difficulties and pitfalls of gathering data and know about data preparation and sampling techniques.
- understand the basic concepts and measures of descriptive statistics and are able to make use of them in data analysis.
- be proficient in various analysis techniques, such as correlation analysis, linear regression, and time series analysis, and know how to apply them in empirical studies.
- calculate price indexes and can explain their role in determining economic indicators.
- understand the notion of probability, its basic calculation rules, and its implications for taking business decisions under risk.
- be familiar with random variables, the most important discrete and continuous distribution types, and their relevance for economic and financial modelling.

Teaching and Learning Methods

Classical lecture with integrated exercises and examples; case studies based on complex data sets; self-guided learning; teamwork; data modelling and statistical modelling in Excel; application of specific statistics software. Extensive use of exercises, both, in class and at home. Simultaneous study of textbooks.

Content

Basic concepts of descriptive statistics
- Ontology: objects, attributes, variables, values
- Data sourcing, collection, preparation, and sampling
- Frequency function and distribution function

Univariate statistical analysis
- Representations of frequency distributions
- Location parameters
- Dispersion parameters
- Concentration coefficients

Bivariate statistics
- Statistical dependency
- Correlation metrics
- Linear regression analysis

Time dependent data
- Components of time series'
- Trend analysis and forecasts
- Moving average
- Exponential smoothing

Indexes
- Index numbers
- Market baskets and price indexes

Basic notions of combinatorics
- Mathematical prerequisites
- Permutations, combinations, and variations

Probability theory
- Concept of probability
- Fundamental theorems of probability theory
- Random variables and distribution functions
- Expected value and variance
- Distributions of discrete variables
- Distributions of continuous variables

Basic Readings

UBØE, J.: *Introductory Statistics for Business and Economics*. *Theory, Exercises and Solutions*. Springer, 2017 (Print and eBook).
ÖZDEMIR, D.: *Applied Statistics for Economics and Business*. 2e, Springer, 2016 (Print and eBook).

Further Readings

FLUX, J.: *Business Statistics All in One Skills Practice Workbook: With Full Step by Step Solutions.* Math Magicians, 2024.
NEWBOLD, P; CARLSON, W.L.; THORNE, B.M.: *Statistics for Business and Economics, Global Edition. Pearson, 2023.*

Financial Accounting

Basic Information

Abbreviation	BAFA
Person in Charge of Module	Prof. Dr. Dana Doege
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Double-Entry Accounting
- Statements of Financial Position
- German GAAP
- IAS/IFRS
- Financial Key Performance Indicators

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the bookkeeping and the preparation of annual accounts.
- have gained the capability to evaluate the regulatory environment within which annual reports are produced in Germany.
- further understand and can evaluate some of the individual regulations that affect the analysis of financial statements.

Teaching and Learning Methods

Lecture with integrated exercises, group discussions and group work, homework, case studies, supervised practical exercises

Content

- Legal Aspects of Accounting (German Law)
- Introduction to Statements of Financial Position
- Double-Entry Accounting
- Opening and Closing Balance Sheet Account

- Selected Accounting Transactions Affecting and not Affecting Net Income
- Elements of Annual Reports
- Introduction to Recognition Principles of German GAAP and IAS/IFRS
- Financial Analysis

Basic Readings

BERKAU, C.: *Basics of Accounting*. 4e, UVK Verlagsgesellschaft mbH, 2021.
ROBINSON, S.: *Frank Wood's Book-Keeping and Accounts*. 9e, Pearson, 2017.
HOLMES, G., SUDGEN, A.: *Interpreting Company Reports and Accounts*. 10e, Pearson, 2008.

Further Readings

YOUNG, D, COHEN, J., BENS, D.: *Corporate Financial Reporting and Analysis*. 4e, Wiley, 2018.

Personal & Teamworking Skills

Basic Information

Abbreviation	BAPTS
Person in Charge of Module	Prof. Dr. Melan Thuraiappah
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	E**P**90

Keywords

- Personal-Skills
- Teamworking-Skills
- Teamwork
- Leadership
- Self-Leadership
- Collaboration
- Soft-Skills
- Emotional Intelligence

Admission Requirements for the Module

- None

Recommendation for the Module

- Intercultural Communication

Qualification and competency goals

Upon successful completion of this module, students are able to

- demonstrate a deep understanding of their personal strengths, weaknesses, and aspirations, thereby promoting self-awareness and supporting their personal development.
- apply advanced interpersonal and communication skills, enabling effective collaboration within cross-cultural and multidisciplinary teams.
- understand the principles of leadership and teamwork.
- take on leadership roles and contribute meaningfully within team settings by recognizing and navigating group dynamics in diverse business environments.
- utilize problem-solving techniques and conflict resolution strategies to address complex challenges, particularly in the context of global business and digital management.

Teaching and learning methods

Lectures: The module incorporates traditional lectures to provide foundational knowledge and concepts related to personal and teamworking skills.
Interactive Workshops: Students engage in interactive workshops, where they practice real-world scenarios, develop problem-solving skills, and participate in team activities.
Peer Coaching: Analyzing real-life case studies offers insights into practical applications of personal and teamworking skills.
Group Projects: Collaborative group projects foster teamwork, decision-making, and leadership in a team setting.

Content

Introduction to Personal Development
- Self-awareness and self-assessment
- Emotional intelligence
- Goal setting and time management

Interpersonal Communication
- Effective communication techniques
- Cross-cultural communication
- Active listening and feedback

Leadership and Team Dynamics
- Leadership styles and approaches
- Team formation and roles
- Motivation and team performance

Collaboration and Problem Solving
- Collaboration tools and techniques
- Creative problem-solving methods
- Decision-making processes

Conflict Resolution and Negotiation
- Conflict identification and resolution strategies
- Negotiation skills
- Mediation and arbitration in business

Basic readings

BRADBERRY T. AND GREAVES J.: *Emotional Intelligence 2.0*. TalentSmart, 2009.
SWITZLER A., GRENNY J., and MCMILLAN R.: *Crucial Conversations: Tools for Talking When Stakes Are High*. Mcgraw-Hill Professional, 2011
STANLEY G.: *Team of Teams: New Rules of Engagement for a Complex World*. Penguin, 2015.

Further readings

BROWN B.: *Dare to Lead: Brave Work. Tough Conversations. Whole Hearts*. Vermilion, 2018.
STONE D., PATTON B. and HEEN S.: *Difficult Conversations: How to Discuss What Matters Most*. Penguin Publishing Group, 2010.
SINEK S.: *Leaders Eat Last: Why Some Teams Pull Together and Others Don't.* Portfolio, 2014.

Foreign Language II - Deutsch als Fremdsprache II (Level CEFR A2)

Basic Information

Abbreviation	BADFS2
Person in Charge of Module	Karin Carroll-Scott
Language	German
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Grammar
- Everyday life
- German culture

Admission Requirements for the Module

- Completion of German I (Level CEFR A1)

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- develop communicative competence in German that encompass both receptive (listening and reading) and productive (speaking and writing) skills on level CEFR A2
- understand German ways of thinking and behaving, explained from the perspective of German culture and its historical background.
- read simple texts that contain every day or professional language.
- understand simple dialogues
- ask and answer simple questions.
- write short personal and professional notes and messages.

Teaching and Learning Methods

Interactive teaching methods are employed. The focus is on functional instrumentalization of the language. Receptive and productive competencies are trained using role plays, partner and group work,

exercises, case studies, audio and video sequences, and internet research.

Content

At work
- Professions
- Education
- Curriculum vitae
- A day at the office

Hobbies and leisure
- Leisure activities
- Music
- Cinema
- Shopping
- Spending money
- Vocabulary around money

Holidays and travel
- Planning a trip
- City trips

Living and eating
- Living circumstances
- The garden
- Healthy food and lifestyle

Politics and Technology
- Domestic news
- News from abroad
- The environment

Grammar
- Adjectives
- Adverbs
- Nouns
- Main clauses
- Dative verbs
- Accusative verbs
- Conditional
- Expressions of time
- Sub clauses
- Prepositions
- General revision

Basic Readings

BUSCHA, A. ET AL.: Begegnungen A2. Schubert, 2021.
COGGLE, P.: Willkommen! 1 German Beginners Course. Teach Yourself, 2018.

Further Readings

Langenscheidt: German Grammar in a Nutshell. Langenscheidt 2021
DK: German English Illustrated Dictionary. DK, 2023.

Foreign Language II – Chinese II (CEFR Level A2)

Basic Information

Abbreviation	BACH2
Person in Charge of Module	Karin Carroll-Scott
Language	Chinese
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Basic Grammar
- Everyday life
- Chinese Culture

Admission Requirements for the Module

- Completion of Chinese Level I (CEFR A1)

Recommendation for the Module

- None

Qualification and Competence Goals of the Module:

Upon successful completion of this module, students are able to

- develop comprehensive communicative competence in Chinese, encompassing both receptive and productive language skills (CEFR A2).
- understand Chinese ways of thinking and behaviour, explained from the perspective of Chinese culture, including its historical and ideological background.
- understand familiar words and simple sentences that relate to themselves or their immediate environment.
- ask and answer simple questions.
- write short notes and messages

Teaching and Learning Methods

Receptive and productive skills are taught using task- and action-oriented texts, textbooks, simple authentic materials, and audiovisual aids. Active participation by students in exercises, partner work, role-plays, and discussions are required.

Content

Topics - Everyday life (II)

- Introduction to philosophy, history, and culture
- Stating and asking about quantities and prices
- In stores and at the market
- Stating dates
- Congratulating someone on their birthday or other celebrations
- Negotiating prices
- Giving directions

Grammar (II)

- Numbers up to 100, addition, subtraction, multiplication, division
- Counting words, forming questions about numbers
- Indicating time and place as adverbial phrases
- Alternative questions
- Order of the date. Sentences with double function elements
- Modal particles

Pronunciation and intonation
Characters
Chinese economy I and regional studies

Basic Readings

PANG, ZHAOXIA & HERD, RUTH: Complete Mandarin Chinese. Beginner to Intermediate Course. Teach Yourself, 2021.

Further Readings

LING, LING: Chinese Conversations for Beginners. Chinese Short Stories. Lingling Mandarin, 2024.
DK: Mandarin Chinese English. Bilingual Visual Dictionary. DK, 2018.

Foreign Language II - Spanish II (CEFR Level A2)

Basic Information

Abbreviation	BASP2
Person in Charge of Module	Karin Carroll-Scott
Language	Spanish
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- Grammar
- Spanish Culture
- Business Correspondance

Admission Requirements for the Module

- Completion of Spanish I (Level CEFR A1)

Recommendation for the Module

- None

Qualifications and competency goals of the module:

Upon successful completion of this module, students are able to

- develop communicative competence in Spanish that encompass both receptive (listening and reading) and productive (speaking and writing) skills on level CEFR A2
- understand Spanish ways of thinking and behaving, explained from the perspective of Spanish culture and its historical and ideological background.
- read simple texts that contain every day or professional language.
- understand simple dialogues
- ask and answer simple questions.
- write short personal and professional notes and messages.

Teaching and Learning Methods

Receptive and productive skills are practiced using task-based and action-oriented texts with the help of textbooks, simple authentic materials, and audiovisual aids. Active participation of the students in exercises, pair work, role-plays, and discussions is required.

Content

Grammar

- Comparatives
- Superlatives
- Subjunctive Present
- *al* + Infinitive
- Gerund
- Irregular Verbs
- Short Forms of the Adjective
- Personal Pronouns after Prepositions
- Prepositions
- Conditional
- Indefinido
- Future and Conditional
- Imperfecto
- Pluscuamperfecto

Business Correspondence

- The Business Letter
- Price Inquiry
- Offer
- Order
- Order Confirmation
- Confirmation of Receipt
- Complaint

Spanish Economy I and Regional Studies

Basic Readings

IGLESIAS, GARMENDIA ET AL.: Aula Internacional Plus A2. Ed Alemán, Difusión, 2022.

Further Readings

NISSENBERG, GILDA: Complete Spanish Grammar, 4th Edition, McGraw Hill, 2020.
RUDOLPH, HILDEGARD: Spanisch. Die neue Power-Grammatik, Hueber: Mannheim, 2021.

Foreign Language II – French Advanced (CEFR Level B2.2)

Basic Information

Abbreviation	BAFR2
Person in Charge of Module	Karin Carroll-Scott
Language	French
ECTS Points	5
Contact hours	50
Self-study hours	75
Length	1 Semester
Frequency	Annual
Exam	E90

Keywords

- French in the business World
- French economy and regional studies

Admission Requirements for the Module

- Module Foreign Language I (Level CEFR B2.1)

Recommendation for the Module

- None

Qualifications and competency goals of the module:

Upon successful completion of this module, students are able to

- Develop communicative competence in French that encompass both receptive (listening and reading) and productive (speaking and writing) skills on level CEFR B2.2)
- understand complex economic topics presented in the form of lectures and discussions.
- read longer economic texts at an intermediate level and understand their content
- express themselves fluently in the target language. They can present and defend their views on various economic topics.
- handle business correspondence and write coherent texts on various economic topics

Teaching and Learning Methods

Based on modern foreign language teaching methods. The focus is on the functional and instrumental aspects of language in interactive situations. Receptive and productive skills are taught through role-playing, partner and group work, exercises, case studies, audio and video sequences, and Internet research.

Content

The company
- Basic vocabulary
- The place and role of the company in the overall economy
- The different types of companies
- Commercial companies (foundation, liability, decisions, control)
- Internal structure of a corporation: organizational chart
- The entrepreneurial spirit
- Declaration of bankruptcy

Business via the Internet
- Business to business, business to consumer
- E-commerce

Business correspondence
- Form and characteristics of a French business letter
- Enquiries (general/specific enquiries)
- Offers
- Orders (placing, confirming)
- Delivery and payment terms

French economy and regional studies

Basic Readings

PENFORNIS, J: affaires.com (3rd edition) B2-C1, Stuttgart 2017.
PENFORNIS, J: affaires.com (3rd edition): Cahier D'activités, Stuttgart 2018.

Further Readings

Miquel, C.: Communication progressive du français, 2018.

Business Innovation Lab I – Analysis of Market Data

Basic Information

Abbreviation	BABILI-AMD
Person in Charge of Module	Prof. Dr. Angelika Roechter
Language	English
ECTS Points	5
Contact hours	20
Self-study hours	105
Length	1 Semester
Frequency	Annual
Exam	P

Keywords

- Market Research
- Market Analysis
- Data Interpretation
- Business Communication
- Teamwork

Admission Requirements for the Module

- None

Recommendation for the Module

- Academic Research
- Business Mathematics
- Business Statistics
- Business English

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- apply quantitative and qualitative research methods to real-life business problems.
- conduct comprehensive market data analyses (e.g., competitor or customer segment analyses).
- derive actionable insights from data to support business decision-making.
- work effectively in teams on real-world projects under time and performance pressure.
- communicate findings in a clear, structured, and professional manner – both in writing and orally – to academic and business audiences.
- collaborate with corporate stakeholders, understand project briefs, and manage expectations professionally.

Teaching and Learning Methods

- Group project work on real-world business challenges
- Kick-off and method workshops led by academic instructors
- Coaching and feedback sessions led by academic teaching staff
- Company briefing and mid-term check-in with business partner
- Independent research and group collaboration
- Peer learning through feedback discussions and joint reflection
- Final written report and presentation in front of instructors, business partners, and peers

Content

The module is centred around a practical group project provided by a corporate partner. Students will be tasked with analysing specific market data related to a current business question. Possible project topics include:

- Competitor landscape analysis
- Customer behaviour analysis in specific demographics
- Demand analysis for a new product or service
- Regional market attractiveness analysis

The content is divided into the following phases:

1. Introduction and Kick-Off:
    - Introduction to the company and project scope
    - Overview of relevant analysis tools and methods
2. Research Phase:
    - Data collection (primary and/or secondary)
    - Data analysis using business statistics and research methods
3. Interpretation and Report Writing:
    - Structuring insights into a coherent narrative
    - Linking data findings with managerial implications
4. Final Presentation:
    - Group presentation and defence of results to the academic and business audience

Basic Readings

Burns, A.C., Bush, R.F. (2020). *Marketing Research*. Pearson.
Malhotra, N.K. (2019). *Essentials of Marketing Research: A Hands-On Orientation*. Pearson.

Further Readings

Kotler, P., Keller, K.L. (2022). *Marketing Management*. Pearson.
Hair, J.F., et al. (2019). *Essentials of Business Research Methods*. Routledge.
Zikmund, W.G., et al. (2020). *Business Research Methods*. Cengage Learning.
Selected academic journal articles and case studies provided during the module.

SEMESTER 3

International Strategy

Basic Information

Abbreviation	BAIS
Person in Charge of Module	Prof. Dr. Gerhard Peters
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	**E**R90

Keywords

- International Business
- Strategy
- Going International
- Firm Internationalization
- Entry Modes
- Foreign Direct Investments
- International M&A
- Alliance Management
- Risk Management

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Intercultural Communication
- Global Business Environment

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- distinguish between different strategies of firm internationalization.
- evaluate the suitability of various entry modes that are available for firms to extend their business internationally.
- know how to address management issues in international business cooperations.

Teaching and Learning Methods

Lecture, Self-study, Exercises, Case Studies, Literature studies, Group Work, Presentations

Content

Introduction to international business strategy

- Corporate level strategies and orientations (EPRG)
- Business level strategies
- Functional strategies
- Timing strategies

Going international: Theoretical foundations and analysis for international market and entry mode selection

- Internationalization theory
- Contingency theory

Entry modes

- External modes
- Internal modes

Implementation, management and control in international business

- Foreign direct investments: Greenfield versus acquisition
- Cooperations and alliances
- Risk management

Basic Readings

HILL, C.: *Global Business Today*. McGraw-Hill, 2021
BARTLETT, C. A.., BEAMISH, P. W.: *Transnational Management*. Cambridge University Press, 2018.

Further Readings

CUERVO-CAZURRA, A., NEWBURRY, W., PARK, S. H.: *Building Strategic Capabilities in Emerging Markets*. Cambridge University Press, 2020.
FITZGERALD, R.: *The Rise of the Global Company*. Cambridge University Press, 2016.

Operations Management

Basic Information

Abbreviation	BAOM
Person in Charge of Module	Prof. Dr. Thomas Jensen
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	**E**P90

Keywords

- Supply Chain Planning and Control Systems
- Material Requirements Planning
- Inventory Management
- Capacity and Facilities Planning
- Facility Location Planning

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Business Mathematics
- Business Statistics

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand why the operations function is central to competitiveness and how this function is imbedded into the overall supply chain strategy.
- transform practical problems into formal decision models and they are familiar with selected solution techniques to solve these models.
- identify, analyse and prepare the relevant data that are needed as input for quantitative and qualitative decision models.

Teaching and Learning Methods

Individual and cooperative learning, problem-oriented and integrative learning, synchronous and asynchronous learning; case study work and expert lectures.

Content

Introduction
- Operations as a competitive weapon
- Decision making
- Operations performance and strategy
- Supply Chains for Services and Manufacturing
- Lean operations

Product and process design
- Process analysis
- Process performance and process quality
- Process layout
- Constraint management

Capacity and facilities planning
- Facility location planning
- Locations and inventory planning
- Designing basic layouts
- Facility layout planning

Resource planning and control
- Data used in resource planning
- Sales operations planning
- MRP vs. stochastic inventory control
- Capacity requirements planning
- ERP systems and APS software systems

Scheduling
- Objectives and interdependencies
- Scheduling in manufacturing systems
- Scheduling in service environments

Inventory management
- Types of inventories
- Deterministic inventory control
- Stochastic inventory control
- Special inventory control models

How trends affect the Operations management function
- Technology changes and digitalization
- Social and environmental responsibility
- Climate change

Basic Readings

SLACK, N., BRANDON-JONES, A.: *Operations Management*. 10e, Pearson 2022.
KRAJEWSKI, L., MALHOTRA, M.: *Operations Management*. 13e, Pearson 2021.
RUSSELL, R.S., TAYLOR III, R.W.: *Operations and Supply Chain Management*. 11e, John Wiley & Sons 2023.

Further Readings

KELTON, W.D., SADOWSKI, R.P., ZUPICK, N.B.: *Simulation with Arena*. 6e, McGraw-Hill 2014.
HILLIER, F., LIEBERMAN. G.: *Introduction to Operations Research*. 11e, McGraw-Hill 2014.

Project Management

Exam	E**P**90

Keywords

- Project Management
- Initiation, planning, management, control and completion of projects
- Process models

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- know the relevant theoretical fundamentals as well as the practical methods and instruments for planning, managing and carrying out complex tasks and projects.
- formulate project goals and find suitable project organizations.
- monitor and control quality, risks and progress in projects and respond to changes and obstacles with appropriate measures.
- understand project management as a comprehensive instrument within the organization of a company.
- know when and how to use the various project management tools depending on the situation and in a goal-oriented manner.
- prepare for future management tasks within the framework of their role as a project team member, project coordinator or team leader.
- discuss projects in a theoretically and methodologically sound manner with specialist representatives and non-specialists.

Teaching and Learning Methods

Individual and cooperative learning, problem-oriented and integrative learning, teamwork, project work, case study work.

Content

Fundamentals of projects and project management
- Definitions
- Challenges and trends for companies
- Classification of projects and project dimensions
- Phases of project management and process models

Project initiation
- Project goals and assignment
- Project organization and selection of team members
- Stakeholder, environmental and economic analysis

Project planning
- Phase planning and structure planning
- Effort estimate
- Scheduling, resources and cost planning
- Quality and risk planning

Project management and control
- Deadline, cost and progress control
- Earned value analysis
- Documentation

Project completion
- Project acceptance and termination
- Final analysis and collection of experiences

Basic Readings

KERZNER, H.: *Project Management: A Systems Approach to Planning, Scheduling and Controlling*. 13e, Wiley, 2022.

Keywords

- Identification, analysis and optimisation of business processes
- Corporate strategy and organization
- Modelling of business processes, e.g. EPK, BPMN
- Process and reference models, e.g. BPMM, SCOR, ITIL, ISO 9000, COBIT
- Quality

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Information Systems & Digitalization

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the necessity of analysing business processes to ensure and enhance the competitiveness of companies.
- know the fundamental concepts of business process management and their relevance to corporate strategy, organizational design, social responsibility, quality management, project management, and change management.
- identify, structure, and model business processes using established methods and tools.
- analyse, monitor, and optimize business processes based on essential management approaches and apply these techniques in practical scenarios.
- evaluate and apply business process models to real-world situations, including a critical reflection on their potential, limitations, opportunities, and risks.
- know common process and reference models and assess their applicability in various corporate context

Teaching and Learning Methods

Individual and cooperative learning, problem-based and integrative learning, inquiry-based learning, case study work, expert lectures.

Content

Fundamentals of business processes and business process management

- Definition
- Challenges and trends for companies
- Typical problem areas in business processes
- Relation to corporate strategy and organization
- Business Process Ethics
- Reference to Lean and Agile
- Relation to quality management
- Related to project and change management
- Related to workflow management
- Roles in business process management

Identification and structuring of business processes

- Instruments and methods of as-is analysis
- View concepts

Modelling methods of companies and business processes

- EPK
- BMM and BPMN

Analysis, controlling and optimisation of business processes

- Corporate strategy and corporate organization
- Process goals and key figures
- Approaches and procedures for process optimisation

Process, reference and maturity models

- Business Process Maturity Model (BPMM)
- Supply Chain Operations Reference Model (SCOR)
- IT Service Management (ITIL)
- Control Objectives for Information and related Technology (COBIT)

ISO 9000

- Cost Accounting
- Cost Analysis
- Planning and Budgeting
- Management Control
- Management Reporting

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Financial Accounting
- Business Mathematics
- Business Statistics

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the effect of each single business decision on the financial performance of the company.
- classify the controlling/management accounting conceptions and compare them.
- explain management accounting's important roles in decision-making.
- define and explain cost accounting und measurement terminologies and methods as well as cost management systems.

Teaching and Learning Methods

Lecture with integrated exercises, group discussions and group work, homework, case studies, supervised practical exercises

Content

Cost and Performance Accounting
- Cost-type Accounting
- Cost-center Accounting
- Cost-unit Accounting

Basic Principles and Categories of Management Accounting/Controlling
Cost Analysis and Cost Management Systems
- Direct Costing and Break-Even-Analysis
- Target costing
- Activity-based Costing

Planning and Budgeting
Management Control System / Management Reporting
- Content and Layout requirements
- Key Performance Indicators

Business Innovation Lab II – Project Planning in Practice

Basic Information

Abbreviation	BABILII
Person in Charge of Module	Prof. Dr. Angelika Roechter
Language	English
ECTS Points	5
Contact hours	15
Self-study hours	110
Length	1 Semester
Frequency	Annual
Exam	P

Keywords

- Project Planning and Timeline Development
- Business Communication
- Risk Assessment
- Teamwork

Admission Requirements for the Module

- None

Recommendation for the Module

- Project Management
- Business English

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand and interpret project briefs provided by corporate partners.
- develop comprehensive project plans, including objectives, timelines, responsibilities, and deliverables.
- apply project management tools and methodologies (e.g., Gantt charts, stakeholder analysis, risk assessments) to real business cases.
- collaborate in teams to solve complex organizational challenges.
- communicate professionally with both academic supervisors and corporate clients.
- present project plans and the identified risks in a structured and persuasive manner.
- collaborate with corporate stakeholders, understand project briefs, and manage expectations professionally.

Teaching and Learning Methods

- Coaching by academic staff in the definition of project goals and framework conditions

- Briefing sessions by the company to define expectations and real parameters
- Group work under the guidance of academic staff
- Team coaching by lecturers
- Independent preparation of documentation and presentation
- Peer learning through feedback discussions and joint reflection

Content

This module centres on creating a professional project plan for a business problem posed by a partner company. It emphasizes the practical application of project management knowledge gained in previous coursework. Topics and tasks may include:

- Understanding the business problem and project context
- Defining project scope, objectives, and deliverables
- Creating work breakdown structures and Gantt charts
- Identifying stakeholders and communication strategies
- Risk analysis and contingency planning
- Resource planning and allocation
- Developing a final project proposal (written and oral)

The module culminates in two deliverables:

1. A written project plan that meets both academic and professional standards
2. A final group presentation to instructors, business partners, and peers

Basic Readings

Kerzner, H. (2022). *Project Management: A Systems Approach to Planning, Scheduling, and Controlling*. Wiley.
PMI (2021). *A Guide to the Project Management Body of Knowledge* (PMBOK Guide) – 7th Edition. Project Management Institute.
Meredith, J.R., Shafer, S.M. (2019). *Project Management: A Strategic Managerial Approach*. Wiley.

Further Readings

Turner, J.R. (2016). *Gower Handbook of Project Management. Routledge*.
Verzuh, E. (2021). *The Fast Forward MBA in Project Management*. Wiley.
Relevant case studies, templates, and project documentation guidelines provided throughout the course.

SEMESTER 4

International Marketing

Basic Information

Abbreviation	BAIM
Person in Charge of Module	Prof. Dr. Gerhard Peters
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Weighting	5/150
Exam	E**P**90

Keywords

- Marketing
- International Marketing
- Marketing Research
- Marketing Strategy
- Marketing Programs
- Products and Brands
- Distribution
- Marketing Communication
- Global Pricing

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Intercultural Communication
- Global Business Environment
- International Strategy

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- distinguish leading marketing concepts and apply them across country markets.
- undertake basic marketing research, interpret and apply marketing research findings to inform and improve marketing decisions within organizations in a global environment.
- devise marketing goals and strategies for companies which are challenged by the complexities and costs when operating in the global marketplace.

Teaching and Learning Methods

Lecture, Self-study, Exercises, Case Studies, Literature studies, Group Work, Presentations

Content

The marketing perspective
- What is marketing?
- The route to market orientation

International marketing research
- Customer Behaviour
- Marketing research

International marketing strategy
- Goals and objectives
- Marketing strategies

International market offerings and marketing programs
- Product management and branding
- Distribution and logistics management
- Communications and promotions
- Global pricing

Basic Readings

KOTLER, P, ARMSTRONG, G: *Principles of Marketing*. Pearson, 2020.
CZINKOTA, M., RONKAINEN, I.: *International Marketing*. Cengage Learning EMEA, 2022.

Further Readings

KOTABE, M., HELSEN, K: *Global Marketing Management*. Wiley, 2022.
HOLLENSEN, S.: *Global Marketing*. Pearson, 2020.

International Human Resource Management

Basic Information

Abbreviation	BAIHRM
Person in Charge of Module	Prof. Dr. Angelika Roechter
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	**E**PR90

Keywords

- Human Resources Management
- Employment Law
- Talent Management
- Workforce Planning
- Recruitment and Selection
- Training and Management Development
- Compensation and Benefits
- Performance Management

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business
- Intercultural Communication
- Global Business Environment
- International Strategy

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- realise the important role that international human resources management (IHRM) plays in the management of multinational companies.
- know about the culture-specific nature of IHRM and understand that non-cultural factors can also have significant influence on employee management in an international setting.
- understand how IHRM policies and practices might be performed in various countries and have an idea of the difficulties and challenges that multinational companies may experience if they set up subsidiaries in different economies.

Teaching and Learning Methods

Lecture, Self-study, Exercises, Case Studies, Literature studies, Group Work, Presentations.

Content

Internationalization of Human Resource Management
- Going International: Managing HR Across the World
- Differentiate or integrate?
- IHRM in Multinational Enterprises
- IHRM in Mergers and Acquisitions, Joint Ventures, and Alliances

National and Cultural Context
- IHRM and Culture
- International Employment Law, Labor Standards and Ethics
- International Employee Relations

Global Talent Management
- International Workforce Planning and Staffing
- International Recruitment, Selection, and Repatriation
- International Training and Management Development
- International Compensation, Benefits, and Taxes
- International Employee Performance Management

Comparative IHRM
- HRM Issues in Europe
- HRM Issues in North America
- HRM Issues in Asia
- HRM Issues in Latin America and the Caribbean

Basic Readings

ENGLE, A., FESTING, M., DOWLING P.: *International Human Resource Management*. 8e, Cengage Learning EMEA, 2023.
REICHE, B.S., HARZING A., TENZER, H.: *International Human Resource Management*. 5e, SAGE Publications, 2018.

Exam	**E**P90

Keywords

- Artificial Intelligence (AI)
- Machine Learning
- Natural Language Processing
- Ethical and Social Applications

Admission Requirements for the Module

- None

Recommendation for the Module

- Information Systems & Digitalization
- Business Mathematics
- Business Statistics

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the core concepts and theories of AI, including machine learning, deep learning and natural language processing.
- leverage AI-driven insights for competitive advantage in business.
- know how to evaluate the ethical, legal and social implications of AI in business.
- learn how to apply AI tools for data-driven decision making and process optimization.
- explore case studies on AI applications in business related areas.

Teaching and Learning Methods

Individual and cooperative learning, problem-oriented and integrative learning, Case study work and expert lectures

Content

Introduction to AI

- Definitions, history, key technologies

Basic Techniques

- Supervised, unsupervised, and reinforcement learning
- Natural Language Processing

AI in Business (subject to change based on technological advancements)

- Chatbots and virtual assistants
- Personalized marketing
- Sentiment analysis
- Fraud detection
- Robotics
- Computer vision
- Predictive maintenance

Ethical, legal and social implication (ELSI)

- Bias, transparency, and data privacy

Future trends in AI

- Emerging technologies and business implication

Basic Readings

AWWAD, B.: *The AI Revolution: Driving Business Innovation and Reserach*. Springer Nature, 2024.
ALAMMAR, J. GROOTENDORST, M..: *Hands-On Large Language Models*. O'Reilly, 2024.

ELECTIVE: Online & Social Media Marketing

Basic Information

Abbreviation	BAOSM
Person in Charge of Module	Prof. Dr. Ralf Ueding
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	EP**R**90

Keywords

- Fundamentals of Online and Social Media Marketing
- Integration in the Marketing Mix
- Social Media Platforms and Targeting
- Strategy Development and Campaign Management
- Innovation and Data Use in Social Media
- Legal and Ethical Aspects

Admission Requirements for the Module

- None

Recommendation for the Module

- International Marketing

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- explain the evolution, core concepts, and unique characteristics of online and social media marketing compared to traditional marketing channels.
- analyse digital consumer behaviour and apply insights to optimize online marketing strategies.
- integrate digital and social media channels effectively into the broader marketing mix, aligning them with strategic positioning and customer journeys.
- evaluate major social media platforms based on audience characteristics, global reach, and content suitability.
- develop targeted social media strategies for different markets, using audience segmentation and platform-specific content adaptation.
- design a social media campaign in a first approach, including planning, content creation, storytelling, community engagement, and influencer collaboration.
- analyse social media data and KPIs to measure campaign effectiveness and support decision-making.

- demonstrate a basic understanding of legal and ethical issues in digital marketing.

Teaching and Learning Methods

Interactive lectures, in-class discussions, case study analysis, group projects and presentations, guest lectures by online and social marketing professionals, independent reading and research

Content

Fundamentals of Online and Social Media Marketing
- Evolution and definition of digital and social media marketing
- Characteristics of digital consumers and user behaviour
- Key differences between traditional and digital channels

Integration in the Marketing Mix
- Digital marketing strategy and positioning
- Customer journey and touchpoints
- Social media as a channel for branding, service, and customer interaction

Social Media Platforms and Targeting
- Overview of major social media platforms (e.g. Facebook, Instagram, LinkedIn, TikTok, X)
- Audience segmentation and targeting in international markets
- Matching content to platform and audience

Strategy Development and Campaign Management
- Planning and implementing a social media strategy
- Content creation, storytelling, and content calendars
- Community management and engagement techniques
- Influencer marketing and viral campaign design

Innovation and Data Use in Social Media
- Using social media for market research and trend analysis
- Social media analytics and KPIs

Legal and Ethical Aspects
- GDPR and data privacy
- User-generated content and intellectual property
- Transparency, advertising disclosures, and platform policies

Basic Readings

CHAFFAY D., ELLIS-CHADWICK, F. (2022): *Digital Marketing,* 8th ed. Pearson Education Limited.
ZAHAY, D.et al. (2022): *Social media marketing. A strategic approach,* 3rd ed. CENGAGE Learning.

ELECTIVE: Work & Organisational Psychology

Basic Information

Abbreviation	BAWOP
Person in Charge of Module	Prof. Dr. Angelika Röchter
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	EP**R**90

Keywords

- Work analysis
- Work motivation and satisfaction
- Stress and burnout
- Aptitude diagnostics
- Personnel development
- Commitment
- Organisational climate
- Intercultural psychology

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- demonstrate familiarity with fundamental psychological processes in various areas of organizations and human resource management.
- assess both positive (motivating) and negative (stress-inducing) effects of different forms of work in the context of an increasingly flexible and mobile working environment (“New Work”).
- understand psychological principles relevant to personnel selection and development and apply this knowledge when designing and implementing appropriate procedures.
- recognize and explain processes of employee socialization and identification within organizations and contextualize issues such as staff turnover accordingly.
- understand the significance of organizational climate and culture in relation to employee behaviour and organizational outcomes.
- apply psychological knowledge to effectively and efficiently manage organizational change processes in practice.

- comprehend how cultural backgrounds shape employee behaviour in teams and influence the effectiveness of leadership processes, enabling them to operate successfully in international contexts.

Teaching and Learning Methods

Lecture, group work, case studies, exercises, literature study, presentations. Lectures by experts from business practice to explore individual issues in greater depth.

Content

Fundamentals of work psychology

- Classic and new forms of work
- Work analysis and evaluation
- Work motivation and satisfaction
- Dealing with stress, burnout and psychological strain

Aptitude diagnostics and personnel development

- Fundamentals of aptitude diagnostics
- Test theory and questionnaire construction
- Personnel development from a learning psychology perspective
- Coaching and mentoring

Organisational psychology

- Socialisation, commitment and fluctuation
- Organisational climate and culture
- Change processes from a psychological perspective

Applied intercultural psychology

- Culture and work behaviour
- Working in intercultural teams
- Leadership in an intercultural context

Basic Readings

ARNOLD, J. et al. (2016): *Work Psychology: Understanding Human Behaviour in the Workplace,* 6th ed. Pearson.
SPECTOR, P. E. (2020): *Industrial and Organizational Psychology: Research and Practice,* 8th ed. Wiley.
ROBBINS, S. P., JUDGE, T. A. (2022:) Organizational Behavior, 19th ed. Pearson.

Further Readings

Keywords

- Procurement Management
- Negotiation and Contract Management
- Global Procurement

Admission Requirements for the Module

- None

Recommendation for the Module

- Introduction to Business

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the objectives and core processes of procurement.
- explain the significance of the various tasks and instruments of strategic and operational procurement management, considering the specific context and conditions of global procurement processes.
- evaluate different organizational structures of the purchasing function in terms of their advantages and disadvantages.
- demonstrate familiarity with contractual design options and identify the phases and tactics of purchasing negotiations.
- describe the characteristics and structures of selected procurement markets and recognize the specific challenges related to procuring different classes of procurement objects.
- understand approaches for the digitalization of business processes in procurement and purchasing.
- identify and apply modern tools used in procurement management.

Teaching and Learning Methods

individual and cooperative learning, problem-based and integrative learning, case study work.

Content

Framework Conditions of Procurement
- Importance of Procurement
- Tasks and Objective
- Organization of the Procurement Function
- Current Trends

Strategic Procurement Management
- Make-or-Buy and Outsourcing
- Sourcing Strategies
- Forms of Cooperation in Procurement
- Supplier Evaluation and Supplier Portfolio Management
- Supplier Development

Operational Procurement Management
- Procurement Marketing and Market Research
- Supplier Integration
- Supplier Controlling and Supplier Audits

Negotiation and Contract Management
- Contract Components and Standards
- Contract Management
- Claim Management

Procurement of Selected Types of Goods and Services
- Raw Materials
- Components and Assemblies
- C-Parts and Indirect Procurement
- Energy
- Services
- Capital Goods

Special Aspects of Global Procurement
- Incoterms
- Import, Export, and Customs Law
- Tax Law
- Specific Compliance Requirements
- Payment Processing and the Financial Supply Chain

Basic Readings

LYSONS, K.; FARRINGTON, B. (2016): *Purchasing and Supply Chain Management.* 9. ed., Essex.

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- have an application-oriented overview of a broad range of topics in business informatics.
- have a solid understanding of the basic principles and paradigms of computer systems and computer networks.
- comprehend the core concepts of information systems and can evaluate their strategic importance across various fields of application and hierarchical levels.
- develop the capability to identify challenges and potential courses of action that emerge for networked companies in the context of digital business and describe them at a conceptual level.
- recognize the significance of both internal and external integration of application systems and grasp the importance of new business models.
- gain insight into the interactions between modern information technology and social developments.

Teaching and Learning Methods

Individual and cooperative learning, inquiry-based and integrative learning using exercises and smaller case studies.

Content

Information Systems
- Purpose and Importance of Information Systems
- Significance of IT and Business Informatics

Hardware and Software
- Data and Codes
- Computer Architectures
- Operating Systems and Application Software

Communication Systems and the Internet
- Client-Server and Peer-to-Peer Models
- Modes of Transmission and Protocols
- Internet, Services, and Standards

Strategic Role of Information Systems

Business Innovation Lab III – Feasibility of Foreign Market Entry

Basic Information

Abbreviation	BABILIII-FFME
Person in Charge of Module	Prof. Dr. Angelika Roechter
Language	English
ECTS Points	5
Contact hours	15
Self-study hours	110
Length	1 Semester
Frequency	Annual
Exam	P

Keywords

- Internationalization
- Market Entry Strategy
- Feasibility Study
- Foreign Market Analysis
- Export Readiness
- Cross-Cultural Business
- Strategic Decision-Making
- Business Innovation
- Business Communication
- Teamwork

Admission Requirements for the Module

- None

Recommendation for the Module

- Academic Research
- International Strategy
- Marketing Management
- Business Statistics
- Project Management
- Business English

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- evaluate the feasibility of entering a specific foreign market for a given product or service.
- apply strategic tools to assess opportunities and risks of international expansion.
- identify relevant legal, cultural, economic, and political factors influencing foreign market entry.
- work collaboratively in teams to research and develop actionable recommendations.

- present a strategic market entry proposal in a structured and professional format to business partners and academic staff.
- reflect on challenges of cross-border business decision-making.

Teaching and Learning Methods

- Project kick-off and context-setting by instructors and corporate partners
- Input sessions on market entry frameworks and international strategy tools
- Coaching and feedback sessions throughout the module
- Company briefings and Q&A sessions
- Collaborative group work and market research
- Final strategic recommendation report and presentation

Content

The module is based on a real-world business case provided by a partner company considering expansion into a new international market. Student groups will investigate whether the company's product/service can and should be introduced in a specified foreign market.

Key content areas include:

- Understanding the product/service and its unique value proposition
- Macro-environmental analysis (PESTLE) of the target market
- Market potential and competitive landscape
- Regulatory and legal conditions
- Cultural factors and consumer behaviour
- Strategic entry options (e.g., export, joint venture, direct investment)
- Risk analysis and mitigation strategies
- Final feasibility assessment and recommendation

Deliverables:

1. A comprehensive written feasibility report
2. A group presentation to instructors, company representatives, and peers

Basic Readings

Hollensen, S. (2022). *Global Marketing*. Pearson.
Ghauri, P., & Cateora, P. (2021). *International Marketing*. McGraw-Hill.
Cavusgil, S.T., et al. (2020). *International Business: The New Realities*, Pearson.

Further Readings

Admission Requirements for the Module

- Registration for the internship phase

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- apply, deepen, and further develop the professional, methodological, and interdisciplinary competencies acquired during their studies in a real-world professional environment.
- gain practical experience in an international business or organizational setting, enhancing their understanding of workplace processes and professional expectations.
- be better prepared for future career decisions through strengthened professional orientation and first-hand insights into the operations of internationally active companies or organizations.
- demonstrate the ability to reflect on their practical experience in relation to theoretical knowledge and to derive implications for their ongoing academic and professional development.

Teaching and Learning Methods

-

Content

Students spend their internship in a company and take over various tasks which will enable them to achieve the qualification and competence goals of the module. They are accompanied by supervisors both from the company and FHDW during this process. Upon completion of their internship, they portray and reflect their experiences in the form of a report and presentation, discuss this in the group, and receive feedback from their internship supervisors.

Recommendation for the Module

- Introduction to Business
- Business Process Management
- International Strategy

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand key concepts, theories, and frameworks of business transformation and change management.
- analyse the drivers and barriers to organizational change.
- develop and implement appropriate strategies for planning and executing successful change initiatives.
- evaluate the impact of change on organizational culture and employee behaviour.
- apply change management tools and techniques effectively in real-world business scenarios.
- lead and manage change processes that support sustainable growth and competitive advantage.

Teaching and Learning Methods

Lectures, case studies, group discussions, presentations, workshops and simulations, guest lectures from industry experts

Content

Drivers of Business Transformation
- Digitalization
- Industry 4.0
- Geopolitical Shifts
- Alliance Capitalism

Strategies for Business Transformation
- Value Chain Analysis and Management
- Mergers and Acquisitions
- Resilience Strategies
- Corporate Restructuring and Integration

Leadership and Change
- Theories and Models of Change Management
- Change Management at different levels of the Organization
- Leading Change: Essential Leadership Competencies as a Pre-Requisite for Successful Change Management

Strategic Change and Organizational Development
- Stakeholder Engagement and Communication
- Managing Resistance to Change
- Culture Change
- Monitoring and Sustaining Change
- Case Studies in Business Transformation

Recommendation for the Module

- Introduction to Business
- Information Systems & Digitalization
- Data Technologies
- Operations Management

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- know the elements of analytic information systems and their operational applications within the business analytics process.
- derive analytics problems from business problems and know which resources (data, IT and employees) are required to solve these problems.
- understand which algorithms are suitable for underlying questions and know how to interpret and visualize the outcomes in order to correctly apply them.
- understand how data-supported insights can be translated into concrete operational optimization actions.

Teaching and Learning Methods

Individual and cooperative learning, problem-oriented and integrative learning, Case study work and expert lectures, use of software systems.

Content

Basics
- relevance of data analysis
- terms: data science, business intelligence, machine learning, artificial intelligence, big data
- data analytics process

Framing
- identification of the business problem
- derivation of a related analytics problem

Allocation
- data, data types, data quality, big data, data warehouse, ETL process
- IT-architecture for data analytics
- human resources (roles, organizational structure)

Analytics (overview of methods)
- machine learning, statistical learning
- descriptive analytics
- predictive analytics
- OLAP

Preparation
- presentation of results, visualization
- usage and limits

Basic Readings

Further Readings

POCHIRAJU, B., SESHADRI, S.: *Essentials of Business Analytics*. Springer International Publishing, 2019 PROVOST.

ELECTIVE: Ethics and Compliance Management

Basic Information

Abbreviation	BAECM
Person in Charge of Module	Prof. Dr. Gerhard Peters
Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	E**P**90

Keywords

- Business Ethics
- Corporate Social Responsibility
- Ethical Dilemmas
- Corporate Governance
- Risk Management
- Compliance Management

Admission Requirements for the Module

- None

Recommendation for the Module

- Global Business Environment
- International Strategy

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- understand the fundamental principles of business ethics and their application in an international setting.
- analyse ethical dilemmas and develop strategies for ethical decision-making.
- assess the impact of cultural, legal, technological (including AI), and economic factors on ethical behaviour in international business, based on their acquired knowledge.
- promote ethical practices and sustainability in multinational organizations and develop and monitor respective compliance requirements and their appropriate implementation.

Teaching and Learning Methods

Lectures, case studies, group discussions, presentations.

Content

Introduction to Business Ethics

- Ethical theories and frameworks
- Moral philosophy and ethical reasoning
- Stakeholder theory and corporate governance
  Cultural and Legal Influences
- Cross-cultural ethics and communication
- International legal standards and regulations
- Ethical issues in different economic systems

Corporate Social Responsibility (CSR)

- CSR theories and models
- Sustainability and environmental ethics
- Social entrepreneurship and ethical leadership

Ethical Decision-Making

- Identifying and analysing ethical dilemmas
- Ethical decision-making models and tools
- Case studies of ethical challenges in international business

Promoting Ethical Practices

- Developing and implementing ethical policies
- Ethics training and organizational culture
- Monitoring and reporting on ethical performance

Corporate Governance and Compliance Management

- Risk Management
- Corporate Governance
- IT-Governance

Legal and Regulatory Compliance to National and International Law

- Strategies and Challenges of International Compliance Management
- Trade Compliance
- Labor Compliance
- Environmental Compliance
- Antitrust Compliance

Compliance Monitoring

- Investigation
- Recognizing Wrongdoing
- Enforcement
- Program Evaluation

Basic Readings

Language	English
ECTS Points	5
Contact hours	40
Self-study hours	85
Length	1 Semester
Frequency	Annual
Exam	E**P**90

Keywords

- CSR
- The Triple Bottom Line
- Standards and Frameworks
- Reporting and Communication
- Ethics & Corporate Governance
- Trends and Innovations in Sustainability

Admission Requirements for the Module

- None

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- demonstrate a comprehensive understanding of key concepts and principles related to sustainability and corporate social responsibility in an international business environment.
- analyse and critically evaluate the environmental, social, and governance (ESG) dimensions of business operations.
- assess the impact of global sustainability challenges on corporate strategy and stakeholder expectations.
- apply relevant international standards, frameworks, and tools (e.g., UN SDGs, GRI, UNGC) in sustainability and CSR practices.
- develop responsible business strategies that align with ethical, environmental, and social considerations.
- communicate CSR and sustainability strategies effectively to diverse stakeholder groups.
- reflect on the role of ethical leadership and corporate accountability in promoting sustainable development.

Teaching and Learning Methods

Interactive lectures, case study analysis, group projects and presentations, guest lectures by sustainability and CSR professionals to provide industry insights, independent reading and research

Content

Introduction to Sustainability and CSR
- Definitions and core concepts
- Historical development and global relevance

The Triple Bottom Line: People, Planet, Profit
- Environmental, social, and economic dimensions
- Systems thinking and interdependencies

Self-study hours	300
Length	1 Semester
Frequency	Annual
Exam	Bachelor Thesis

Admission Requirements for the Module

- S. §7 (9) Examination Regulations

Recommendation for the Module

- None

Qualification and Competency Goals

Upon successful completion of this module, students are able to

- develop comprehensive and complex solutions to business problems by applying previously acquired scientific methodologies.
- approach business problems in an efficient and goal-oriented manner, using insights gained from relevant academic literature.
- apply common technical tools and research methodologies effectively.
- recognize the significance of scientific instruments and methods for ensuring the quality of both the development process and the results of their academic work.
- prepare a comprehensive, scientifically sound bachelor's thesis that meets strict academic and formal requirements.
- structure their work based on theoretical frameworks, develop efficient solutions, and meet all formal academic standards.
- demonstrate the ability to apply previously acquired knowledge in a targeted and result-oriented way.
- show that they possess a broad understanding of their field, and the technical expertise required for entering professional business practice.

Content

Students apply scientific methods to prepare relevant solutions to company problems under consideration of the concrete situation at the company. They write a comprehensive scientific thesis.
